Railroad Engines From Around The World Coloring Book (Dover History Coloring Book)

Synopsis

Train lovers of all ages will appreciate these ready-to-color illustrations of historic railroad engines. The collection ranges from the groundbreaking steam-powered locomotives that appeared in the early 1800s and helped usher in the Industrial Revolution to today's sleek Acela Express, the first electrified high-speed train to operate in the United States. Models include Trenithick's Locomotive (1803), the first steam locomotive to run on rails; the English "Stourbridge Lion" (1829), the first steam-powered railroad engine to be used in America; the versatile "General" (1852); the streamlined "Broadway Limited" (1914); Britain's famous passenger train, the "Flying Scotsman" (1922); "The Rocket" (1937) of the Rock Island Line; the innovative diesel-electric locomotive, "The Super Chief" (1946); Japan's high-speed "Bullet" train (1964); and the even-faster "TGV" ("Le Train Grande Vitesse" [1981]) of France, which can reach speeds of up to 195 miles per hour. Each of the 44 illustrations is accompanied by an informative caption.

Book Information

Series: Dover History Coloring Book

Paperback: 48 pages

Publisher: Dover Publications (January 27, 2003)

Language: English

ISBN-10: 0486423786

ISBN-13: 978-0486423784

Product Dimensions: 8.2 x 0.3 x 11.2 inches

Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars See all reviews (12 customer reviews)

Age Range: 8 - 14 years

Grade Level: Preschool - 8

Customer Reviews

I got this for my 5 yr old grandson, who is really into trains. He loved the realistic pictures with the great details. Much nicer than the "cartoon" type drawings in many children's coloring books.

Purchased for 3 year old train fanatic. He loves the book because it's full of trains but it's very detailed and difficult for him to color. It would probably be difficult for anyone to color while using crayons, so this one might be a better buy for the older train lover. Great pictures and loaded with train information.

I like trains and cars, and I also have experienced Bruce's work (Classic Cars, Cars of the Fifties, American Muscle Cars) so when I saw that he authored this work, I knew that I would enjoy it. The pictures are detailed -- especially the steam engines. Bruce took time to get the valve work and driving rods right. There was an occasional gaffe, but those were easy to overlook when considered in the total context of an excellent work. If you are an adult, if you like trains, and if you like to color, this is a book for you.

This is more than just a coloring book. There is actually a lot of information about the trains. I would recommend it for anyone that wants to learn more about trains.

The book is for my 5 year old grandson who loves trains. He loves the trains and reads the descriptions but rarely tried to color it.

My grandson is 3 and loves everything about trains. These pictures are technical and more for an older child, but we will do it together.
