Age Range: 9 and up

Grade Level: 4 and up

Customer Reviews

Not a fan of the current curriculum. However, in the interest of providing opportunities for success for my children and supporting them at home, this book is right on the money as a tool that parallels the work being done in class. Spend the money. Get this book. And then spend time with your child(ren). Eventually the "new" way of doing even the simplest math will make sense to the both of you! ;-)

it seems to have plenty of problems to give him the repetition he needs to learn matter and then builds on that

Worth buying

My daughter likes this workbook so far!

Great recommended, great seller!
