- Time & Task-Management
- Organizing at Home & School
- Writing Strategies
- Note-Taking Strategies
- Test-Taking Strategies
- Paper Organization
- Homework & Project Planning
- Communication Skills
- Reading Skills
- Goal-Setting

Why SOAR Study Skills? Apply the brain-friendly strategies, and... Build Confidence! Raise Test Scores in every subject area. Raise Writing Scores in a single semester. Raise GPA. Master Executive Function techniques for improved intelligence. Gain High-Speed Learning techniques that cut back study-time, as much as 50%. Achieve - better grades... in less time.

How can SOAR Study Skills guarantee all of this? It's simple, SOAR teaches you what your school does NOT... how to learn. It is the most essential, fundamental, and basic element to any education, but schools still don't address it. National and state curriculum demand heavier amounts of content. But, teachers have no time or training for teaching the vital learning strategies and "life-skills" students need!

"SOAR has been a Godsend to our family... You have no idea! My son has not lost one assignment or forgotten anything at school since I set him up with your Binder System. You really demonstrated how to simplify the organizational process and I am so grateful to have found something that finally works!" -- Paul K., Middle School Parent

Is the education system setting students up for failure? Students are learning lots of new technical knowledge. But, very few are able to juggle their new knowledge, time, and tasks all at once. Organizing papers, managing time, managing tasks, taking tests, taking notes, studying, communicating, organizing at home... these are all HUGE functions in everyday school-life. Yet, schools don't teach any of it! Students struggle in school, not because of their lack of intelligence, but because they haven't been taught how to learn!

What is the missing link in education? HOW TO LEARN! Get your child ahead in school by giving them the proper skills needed to be a successful student and more importantly, a successful learner. The strategies in this book are appropriate for students in: upper elementary, middle school, high school, & college.

Do you struggle with test-taking? Flip to page 92. Begin

to discover the tips and tricks you can use immediately, for test taking success. Do you lose easy points for missing assignments? Turn to page 43, and follow the easy to read step-by-step instructions to paper organization mastery. Then, say goodbye to zeros and missing assignments once and for all! Special Features: Tips for students who live in two homes. Guidelines for students with ADD/ADHD. Guidelines to help parents & educators use this book effectively with students.

## Customer Reviews

I got this because my 10 year old son had a couple of grades drop this quarter, and in talking to him, it was not because he found the topics difficult, but rather because he was not studying adequately, and was not studying adequately in part because these two courses are heavily reliant on handouts rather than textbooks, and he was losing all of his handouts! He's in a gifted program in which the materials are often handouts to supplement, so this problem was only going to increase. I bought this as well as two other books (I tend to over-research/bombard problems; the lawyer in me). While it's early yet, I probably could have done with just this book. I think it's worth its weight in gold. The book basically presents a system for organizing and doing better. SOAR stands for Set goals, Organize, Ask questions, and Record your progress. It takes you and the child through prioritizing, setting personal and academic goals, organizing your school gear and your study space, study

skills, including how to maximize textbook reading, paper writing, interacting with teachers, taking notes, and taking tests, and tracking progress. And while it might sound daunting, it's done so that it's fun and motivating, shockingly. My son was kind of the classic, work on homework for 2 hours then forget to turn it in the next day, or cram everything into the bookbag and it gets lost and crumpled in the bottom kid. The binder system prescribed in this book nips that in the bud. His classroom has a general system that uses a bunch of folders for different things (the teacher doesn't take the folders up or anything, so we didn't have to buck the system to opt otherwise). This doesn't really work well for my son, as he will forget to bring home one folder or another.

Susan Krugar is a Certified Teacher with a Master's Degree and is a Reading/Learning Specialist. She developed her own, unique study skills system that includes live and web based classes, educator training, this book and a CD set based on the acronym: (S)oar(O)rganize(A)sk Questions(R)ecord Your Progress The S.O.A.R.® Study Skills soft cover book is beautifully designed, easy to use and filled with illustrations and photographs. There are separate introductions for parents, students, educators and students with ADD/ADHD. Family involvement is very much part of the S.O.A.R.® Study Skills program and the author invites parents to read the book with their children. Readers will learn about task-management, organizing at home & school, prioritizing, goal-setting, note-taking strategies, paper organization, test-taking strategies, homework/project planning, communication & effective skills, reading skills and writing strategies. The goal of the book is to help students of all ages get better grades in less time. The amount of homework assigned to students is overwhelming but this book can help reduce the time and frustration involved. Unlike other study skills systems I have researched the techniques in this book are meant to be simple and easily implemented. I was impressed with the quizzes, charts and forms to record goals and accomplishments. These features make the book truly interactive and involve the reader in not only learning but exploring their own learning styles while developing a set of goals for eliminating homework hassles and improving grades. There is much focus in this book on helping students both at home and at school and I really enjoyed the chapter on interacting with teachers.
