Study Guide For 1Z0-460: Oracle Linux 6 Implementation Essentials (Oracle Certification Prep)
This Study Guide is targeted at IT professionals who are working towards becoming an Oracle Linux 6 Certified Implementation Specialist. The book provides information covering all of the exam topics for the Oracle certification exam: "1Z0-460: Oracle Linux 6 Implementation Essentials". The books in the Oracle Certification Prep series are built in lockstep with the test topics provided by Oracle Education's certification program. Each book is intended to provide the information that will be tested in a clean and concise format. The guides introduce the subject you'll be tested on, follow that with the information you'll need to know for it, and then move on to the next topic. They contain no drills or unrealistic self-tests to bump the page count without adding value. The series is intended to provide a concentrated source of exam information that is compact enough to be read through multiple times. This series is ideal for experienced Oracle professionals that are familiar with the topic being tested, but want a means to rapidly reinforce their existing skills and bridge any gaps in their knowledge. It is also an excellent option as a second source of information for candidates pursuing certification.

Customer Reviews
Good start to prepare for the exam, will refresh your knowledge about OL in height level. Very good for someone with RH experience. Don’t use it for the exam as your single source if you don’t have experience (it’s good but you can’t use it as the only source).

Very helpful in providing a summary of the exam topics and links to the relevant documentation and helpful web pages. This guide helped me achieve a 90% score ... recommended!

Good book but there are some detailed questions at the exam that are not covered here. I was able to pass with this book but was not happy with the score.

Excellent guide for this Exam,

Very good!
